What is the course of a river?

The course is the route the river takes. A course where water only flows after it rains is called a gully. Courses have three parts.

Key words

- delta
- gully
- oxbow lake

THE COURSE OF A RIVER

upper course	middle course	lower course
<p>Rain forms small streams. These erode the land and make V-shaped valleys. Waterfalls form here.</p>	<p>Tributaries join the river and the flow increases. Meanders and oxbow lakes form here.</p>	<p>The river contains a lot of water. It is deep and wide. It deposits mud and sand. Deltas form where the river reaches the sea.</p>
 <p>Cola de caballo waterfall, Aragón</p>	 <p>Melero meander, Extremadura</p>	 <p>Saja river, Cantabria</p>

 **1** In which parts of a river course do you find the source and the mouth? Tell a partner.

The source is in the ... course.

 **2** Look at the photos of the Ebro. Identify the courses. Then, listen and check.
